Projects

Portfolio ReactJS, HTML, CSS.   https://barrymoorer.github.io/portfolio-react/
Developed a personal website to showcase my skills and projects, and implemented HTML and CSS to design and style the site according to my preferences. Additionally, I utilized ReactJS to build dynamic and interactive components of the website, while continuously learning more about the technology. The website serves as a platform for potential employers to learn more about me and my interests, and I regularly maintain and update it to reflect my current abilities and accomplishments.

Chrono Landing Page Javascript, HTML, CSS   https://barrymoorer.github.io/ChronoLandingPage/
Developed a landing page using HTML, CSS, and JavaScript. The header section of the page features a visually appealing and interactive carousel animation that showcases multiple images. This animation was designed to catch the user's attention and create a memorable experience on the page.

TLA Report Database Management PHP, MySQL, HTML, CSS
Developed a project using PHP, MySQL, and web development best practices, including server configuration and database management. The project involved creating a subdirectory and virtual host, a new database for user data, and modifications to the login function, as well as a new page for handling successful logins.

Adventure Insurance Javascript, HTML, CSS   https://barrymoorer.github.io/AdventureInsurance/
Developed a website for Adventure Insurance using HTML, CSS, and JavaScript, with two functional HTML pages and a thank you page, and incorporating a common theme, header, footer, and navigation.To improve performance, a style sheet was created in a "css" subdirectory, and a JavaScript file was added in a "js" subdirectory.
